ROHIT PARIHAR

Senior Full Stack Developer

rohitparihar9758@gmail.com | +91-8791458460 | linkedin.com/in/-rohitparihar | Agra, India

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 4+ years of experience delivering enterprise-grade web applications across banking, insurance, and automation domains. Tech Lead for Mashreq Bank's Audit Platform (UAE), architecting a React 19 + FastAPI SPA with Azure MSAL SSO, JWT-based RBAC, and real-time SSE streaming. Proven track record: reduced customer onboarding time by 67%, improved UI performance by 40%, and cut verification costs by 45% via WebRTC Video-KYC. Expertise spans React.js, TypeScript, FastAPI, Python, PostgreSQL, Docker, Kubernetes, and CI/CD automation.

TECHNICAL SKILLS

Frontend	React.js (v18/v19), Redux Toolkit, TypeScript, JavaScript (ES6+), Angular, Material-UI, Tailwind CSS, Vite, Webpack
Backend	Python, FastAPI, Node.js, REST APIs, WebSocket, SSE, SQLAlchemy, JWT, RBAC, OAuth 2.0, Keycloak, Azure MSAL
Databases	PostgreSQL, MySQL, MongoDB
DevOps & Cloud	Docker, Kubernetes, Git, GitHub, Azure DevOps, Jenkins, CI/CD Pipelines, Helm
Testing	Jest, React Testing Library, JUnit, Cucumber, Robot Framework
Other	System Design, Performance Optimization, LangChain/LangGraph, WebRTC, i18next, Monaco Editor, Socket.io

KEY PROJECTS

Mashreq Audit Platform *May 2024 – Present*

Role: Tech Lead | Client: Mashreq Bank, UAE | *React 19, FastAPI, PostgreSQL, Socket.io, SSE, Azure MSAL, Redux Toolkit, MUI v7, Vite*

- Led end-to-end architecture and delivery of an enterprise audit SPA for automated dormant account identification per CBUAE banking regulations, serving a major UAE bank.
- Built React 19 frontend (Vite, MUI v7, Redux Toolkit, React Router v7) with enterprise SSO via Azure MSAL, JWT-based RBAC, and real-time streaming SSE endpoints for long-running audit operations.
- Implemented document export (PDF, Excel, PowerPoint), Monaco Editor SQL query panels, and full multi-language support via i18next.
- Designed scalable FastAPI backend with PostgreSQL, async endpoints, and structured audit reporting workflows.
- Coordinated cross-functional team delivery, code reviews, and client communication with Mashreq Bank stakeholders.

TAP-DAP — Test Automation Platform *May 2024 – Present*

Role: Tech Lead | WalkingTree Technologies | *React, FastAPI, PostgreSQL, Docker, LangChain, LangGraph, GitHub/Azure DevOps APIs*

- Built an AI-powered platform generating JUnit, Cucumber, and Robot Framework test cases from user stories with 85% accuracy, reducing manual QA effort by 60%.
- Integrated GitHub, Bitbucket, and Azure DevOps APIs for automated Git operations and CI/CD pipeline orchestration.
- Developed React Material-UI dashboard for test management, execution tracking, and reporting.

Diwas — Video-KYC Digital Onboarding (IDRBT) *March 2024 – November 2024*

Role: Senior Full Stack Developer | *React, TypeScript, Redux Toolkit, WebRTC, Node.js*

- Architected digital banking onboarding platform reducing end-to-end process from 15 to 5 minutes (67% reduction).

- Implemented WebRTC-based video streaming with recording for compliance, lowering identity validation costs by 45%.
- Integrated SSO and secure session management with Redux Toolkit state architecture, boosting performance by 20%.

Plutas.AI — Insurance Claims Platform *January 2025 – April 2025*
Role: Senior Frontend Developer | *React.js, TypeScript, REST APIs*

- Modernized insurance claims processing workflow, reducing processing time by 50%.
- Refined mobile UX, decreasing bounce rates by 30% and increasing conversion rates by 20%.

Alpha Tree — Stock Analysis Platform *November 2024 – January 2025*
Role: Senior Frontend Developer | *React.js, Predictive Analytics, Real-time Data Visualization*

- Accelerated stock analysis decision time by 35% through real-time dashboards and predictive visualizations.
- Enhanced UI performance by 40% via component-level code splitting and rendering optimizations.

Grid Scaled Foundations — Robotics Control UI *May 2023 – March 2024*
Role: Frontend Developer | *React.js, WebSocket, Material-UI*

- Improved robot decision response times by 25% via optimized real-time WebSocket communication.
- Built modular control UI eliminating 30% of configuration errors through automated validation.

PROFESSIONAL EXPERIENCE

Senior Software Engineer — WalkingTree Technologies *April 2024 – Present*
Agra, India

- Tech Lead for Mashreq Bank UAE Audit Platform — full-stack React 19 + FastAPI SPA with Azure MSAL SSO, RBAC, and real-time SSE streaming for banking compliance workflows.
- Architected enterprise digital onboarding (Video-KYC) platform reducing customer journey time by 67% (15 → 5 min) and cutting operational costs by 45% via WebRTC-based video verification.
- Led TAP-DAP test automation platform with AI-driven test case generation (JUnit, Cucumber, Robot Framework), reducing QA effort by 60%.
- Improved UI rendering performance by 40% using React optimization: code splitting, lazy loading, memoization, and virtualization for large datasets.
- Implemented enterprise SSO integrations (Azure MSAL, OAuth 2.0, Keycloak) with RBAC across multiple client platforms.
- Mentored team of 5 developers on React, Redux, and TypeScript best practices, improving delivery efficiency by 30%.
- Reduced production incidents by 50% through comprehensive error handling, logging systems, and CI/CD automation.

Software Engineer — WalkingTree Technologies *April 2023 – April 2024*
Agra, India

- Developed React-based profile management module with dynamic form validation, saving 15 minutes per user onboarding session.
- Optimized bundle size reducing initial load time by 40% and improving Lighthouse performance scores from 65 to 95.
- Built real-time data synchronization using WebSocket connections for live dashboard updates.
- Reduced user bounce rate by 25% through UX optimization, A/B testing, and responsive design improvements.

Associate Software Engineer — WalkingTree Technologies *January 2021 – April 2023*
Agra, India

- Revamped HMI/SCADA UI using React and Material-UI, increasing user engagement by 40%.
- Built configuration management tool reducing configuration errors by 30% through automated validation.
- Developed reusable component library adopted across 3 enterprise applications.

EDUCATION

Master of Computer Applications (MCA) 2020 – 2022

Raja Balwant Singh Engineering Technical Campus, Agra

Bachelor of Computer Applications (BCA) 2017 – 2020

Uttam Group of Institutes

AWARDS & RECOGNITION

- Star of the Month — WalkingTree Technologies: Recognized for outstanding performance, technical leadership, and consistent delivery of high-impact enterprise solutions.
